MedEvolve Practice Analytics is a robust business intelligence solution that gives your practice the ability to easily identify issues and trends resulting in faster, better business decisions that will increase financial and operational efficiency. MedEvolve Practice Analytics transforms the data you collect into dynamic, actionable information that’s readily available online—24 hours a day.

This mobile-friendly, cloud-based analytics solution benefits your practice in several ways:

- **Gain insight into your healthcare business-driven Key Performance Indicators (KPIs),** so you can spend more time focusing on patient care and less time searching for answers.
- **Conduct ad hoc analysis and generate easy to understand reports** with exportable graphs, charts and detailed output to make informed business decisions.
- **Isolate data outliers and exceptions** that require attention with data visualization tools, including previously hard-to-get data like your practice’s top payors and procedures.

- **Review your patient population by zip code** to understand where your patients are coming from and how that may impact your business.
- **Monitor revenue, payment and collectability insights** for revenue integrity.
- **View denial, underpayment, recovery and appeals activity.**
- **Optimize your patient schedule** by monitoring appointment wait times by provider, service and location.
- **Customize the solution to your needs** with our user-defined, role-specific dashboard creation and management functionality.
The accuracy, reliability and intuitive nature of MedEvolve Practice Analytics, combined with our stellar support and unique consultative approach, ensure you can understand and leverage your data to drive decision-making and improve the performance of your practice.

Self-service analytics solution that enables users to review patient-level data and identify trends.
